

Schroder Asian Growth Fund

This Fund Summary is for the following ILP sub-fund and should be read in conjunction with the Product Summary

Fund code	ILP sub-fund	Underlying Fund
E028	Schroder Asian Growth Fund	Schroder Asian Growth Fund A Dis USD

Structure of ILP sub-fund

The ILP sub-fund is an open-ended feeder fund that feed 100% into the Schroder Asian Growth Fund A Dis USD (the “Underlying Fund”, an open-ended stand-alone unit trust, an authorised scheme under the Securities and Futures Act (Chapter 289) of Singapore (the “SFA”). Please refer to the section on “Structure of the Trust” in the Schroder Asian Growth Fund’s Prospectus for further information on the structure of the Underlying Fund.

The units in the ILP sub-fund are not classified as Excluded Investment Products.

Information on the Manager

Investment Manager of the Underlying Fund

The Managers of the Underlying Fund are Schroder Investment Management (Singapore) Ltd (“Managers”), whose registered office is at 138 Market Street #23-01 CapitaGreen, Singapore 048946. The Managers were incorporated in Singapore in 1992 and have been managing collective investment schemes and discretionary funds in Singapore since 1992. The Managers are licensed and regulated by the Authority. The Managers are a member of the Schroder group (“Schroders”). Schroders has been managing collective investment schemes and discretionary funds in Singapore since the 1970s.

Schroders is a leading global asset management company, whose history dates back over 200 years. The group’s holding company, Schroders Plc, is and has been listed on the London Stock Exchange since 1959.

Other Parties

The Custodian of the Underlying Fund is The Hongkong and Shanghai Banking Corporation Limited whose registered office is at 1 Queen's Road Central, Hong Kong.

Please refer to the sections on “The Trustee and Custodian” and “Other Parties” in the Schroder Asian Growth Fund’s Prospectus for details of other parties involved in the Underlying Fund.

Investment Objectives, Focus & Approach

The investment objectives of the ILP sub-fund is to achieve long term capital growth primarily through investing in securities of companies quoted on some or all of the stock markets in countries in Asia, including Australia and New Zealand but excluding Japan. The portfolio of the Underlying Fund will be broadly diversified with no specific industry or sectoral emphasis.

The investment philosophy of the Underlying Fund’s Managers is founded on the belief that returns over the long term are determined by economic and corporate fundamentals and that the analysis of those factors should be the foundation of the Managers' investment strategy. Given that equity markets are not efficient in Asia and that many of the best investment ideas are not well researched, the Managers believe their style of active management with emphasis on bottom-up stock analysis will add value. The Underlying Fund’s Managers' approach is to capitalise on Schroders' strong in-house research capability and exploit market inefficiencies. Over the longer term, the Underlying Fund’s Managers believe that share prices should reflect the ability of companies to create value for shareholders. As such, the distinctive focus of their research is to identify companies that have robust business models, good corporate governance and strong management teams to drive shareholder returns. These are companies that exhibit the following:

- Ability to generate sustainable returns on capital greater than cost of capital.
- Ability to grow and reinvest cash productively.
- Willingness to return free cash flow to minority investors.

At the industry level, the Underlying Fund's Managers seek to predict potential industry developments, focusing on competition, supplier power, barriers to entry, buyer power and threat of substitution amongst other things. As part of their analysis, they form a picture of how different companies may find their place within the longer-term structure of each industry. In this regard, Schroders' global resources are a critical asset in a world where markets are becoming increasingly globalised.

At the company level, the Underlying Fund's Managers seek to discern whether a firm has the tangible and intangible resources to support its positioning within its industry. A company's stated strategy and its management's execution track record are key inputs in the analysis. The Underlying Fund's Managers also emphasise profitability by focusing on a company's ability to generate revenue growth and defend profit margins. A company's ability to generate sustainable free cash flows either to fund business growth or to return to shareholders is also paramount.

Distribution Policy

Please refer to the section on "Distribution of Dividends" (if applicable) in the relevant Investment Linked Product (ILP) – Product Summary for further details.

Risks

The ILP sub-fund is not listed on the Singapore Exchange and you can redeem only on Business Days through Singapore Life Ltd. In respect of Singapore investors, there is no secondary market for the ILP sub-fund.

Please refer to the section on "Risks" in the Schroder Asian Growth Fund's Prospectus for a description of the risk factors associated with investing in the Underlying Fund.

General risks

Investments in the Underlying Fund are subject to different degrees of economic, political, foreign exchange, interest rate, liquidity, default, regulatory and possible repatriation risks depending on the countries that the Underlying Fund invests into. You should be aware that the price of units and the income from them may go down as well as up because the performance of the Underlying Fund may be affected by changes in the market value of securities comprised in the portfolio, which are subject to changes in interest rates, foreign exchange, economic and political conditions and the performance of the corporations whose securities are comprised in the portfolio of the Underlying Fund. While the Managers believe that the Underlying Fund offers potential for capital appreciation, there is no assurance that this objective will be achieved. Past performance is not necessarily a guide to the future performance of the Underlying Fund. You may not get back your original investment. Investments in the Underlying Fund are meant to produce returns over the long term and are not suitable for short-term speculation. You should not expect to obtain short-term gains from such investment.

Market risks

The value of investments may go up and down due to changing economic, political or market conditions, or due to an issuer's individual situation.

In addition, there are risks involved when investing in Asian markets (including the China market), of a nature not generally encountered when investing in securities traded on major international markets. For example:

- (i) government approval may be required to remove capital or profits from the country (or there may be other restrictions causing illiquidity) which may cause delays in or restrictions on removing monies and may impact on the amount of cash available to meet realisations for Units in the Trust or the ability of the Managers to manage its exposure to that market;
- (ii) managing currency risks in the developing market may be more difficult due to the illiquidity of the local currency market or certain regulatory restrictions;
- (iii) the developing market may experience periodic social and political unrest which can disrupt financial markets;
- (iv) where the developing market relies on foreign capital inflows to fund development, withdrawal of foreign capital during periods of uncertainty can cause financial market weakness; and
- (v) Reporting standards applicable in the developing market may be less demanding, which may result in less complete information available when making investments.

Equity Risk

The Underlying Fund may invest in stocks and other equity securities and their derivatives which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities.

Foreign Securities Risk

Investments in securities throughout the world are subject to numerous risks resulting from market and currency fluctuations, future adverse political and economic developments, the possible imposition of restrictions on the repatriation of currency or other governmental laws or restrictions, reduced availability of public information concerning issuers and the lack of uniform accounting, auditing and financial reporting standards or of other regulatory practices and requirements comparable to those applicable to companies in your domicile. In addition, securities of companies or governments of some countries may be illiquid and their prices volatile and, with respect to certain countries, the possibility exists of expropriation, nationalisation, exchange control restrictions, confiscatory taxation and limitations on the use or removal of funds or other assets, including withholding of dividends. Some of the Underlying Funds's securities may be subject to government taxes that could reduce the yield on such securities, and fluctuation in foreign currency exchange rates may affect the value of securities and the appreciation or depreciation of investments. Certain types of investments may result in currency conversion expenses and higher custodial expenses.

Currency Risk

The assets and liabilities of the Underlying Fund may be denominated in currencies other than the Singapore dollar or the United States dollar and the Trust may be affected favourably or unfavourably by exchange control regulations or changes in the exchange rates between the Singapore dollar or the United States dollar and such other currencies. If the currency in which a security is denominated appreciates against the relevant currency of a Class, the value of the security would increase. Conversely, a decline in the exchange rate of the currency would adversely affect the value of the security. The Managers may at their discretion manage the currency risks for either or both Classes of Units by hedging through forward currency contracts, currency futures, currency swap agreements or currency options. Any hedging done for a Class would result in additional hedging costs being borne by such Class. You should note that there is no assurance that the currency risk will be fully hedged.

Risks relating to Hedging

There is no guarantee that the desired hedging instruments will be available or hedging techniques will be effective. The Underlying Fund may suffer significant losses in adverse situations.

Financial Derivatives Risks

The Underlying Fund may use or invest in financial derivatives for the purposes of hedging and/or efficient portfolio management. Where such financial derivatives are financial derivatives on commodities, such transactions shall be settled in cash at all times. The Underlying Fund's use of futures, options, warrants, forwards, swaps or swap options involves increased risk. If the Underlying Fund invests in such instruments, the Underlying Fund's ability to use such instruments successfully depends on the Managers' ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Managers' predictions are wrong, or if the derivatives do not work as anticipated, the Underlying Fund could suffer greater losses than if the Underlying Fund had not used the derivatives. If the Underlying Fund invests in over-the-counter derivatives, there is increased risk that a counterparty may fail to honour its contract. The Underlying Fund will not use derivatives transactions for speculation or leverage. If the Managers use such instruments, it will ensure that the risk management and compliance procedures and controls adopted are adequate and have been or will be implemented and that it has the requisite expertise and experience to manage and contain such investment risks. The global exposure of the Underlying Fund to financial derivative instruments or embedded financial derivative instruments will not exceed 100% of the net asset value of the Underlying Fund at all times. Such exposure will be calculated using the commitment approach as described in, and in accordance with the provisions of, the Code. Investments in derivatives would normally be monitored and controlled by the Managers with regular mark-to-market valuations, careful research prior to investment and compliance monitoring to ensure careful compliance with the investment restrictions set out in the Deed with regard to derivatives.

Schroders, being the group of companies to which the Underlying Fund's Managers belong, has established a Group Derivatives Committee (the "Committee") which reviews and monitors the adequacy and effectiveness of the processes managing operational risks faced by Schroders from the use of derivatives, and will escalate significant issues relating to derivatives to key stakeholders.

The Committee reviews and approves funds using derivatives and new derivative instruments to ensure that the key operational risks have been identified and mitigated before the launch of the fund or execution of the instrument, and is responsible for the policy on new instruments. After approval by the Committee, new derivative instruments are recorded in a derivative-instruments register. This process

is designed to ensure that new derivative instruments are assessed prior to investment by the funds to ensure that the Underlying Fund's Managers have the appropriate processes and controls in place to mitigate operational, investment and credit risks.

The Underlying Fund's Managers have primary responsibility for ensuring that derivative transactions are consistent with the investment objective of a fund. Derivative positions are monitored to ensure that derivative usage is consistent with the fund's investment objectives and in line with the way a fund is offered. Funds are categorised by their performance/risk profiles and risk-related parameters are set for each fund category. The risk-related parameters are monitored by an independent investment risk team, and exceptions are investigated and resolved.

The Underlying Fund's Managers are required to liaise with the risk team or portfolio compliance team to agree on how the derivative investments should be monitored and to clarify any uncertainty in relation to the interpretation of rules or monitoring requirements prior to investing or as soon as the uncertainty arises. The portfolio compliance team is responsible for performing independent compliance monitoring of investment restrictions. The compliance team ensures that the fund managers are made aware of changes to regulations, including those in relation to derivatives usage. The Managers have a system in place to monitor investment restrictions. Where the system does not have the capability to monitor a particular instrument or restriction, the monitoring process is supplemented either by in-house or external systems and/or manual processes.

The above should not be considered to be an exhaustive list of the risks which you should consider before investing into the Underlying Fund. You should be aware that an investment in the Underlying Fund may be exposed to other risks of an exceptional nature from time to time.

Fees and Charges

In addition to the fees and charges shown in the Product Summary, the following fees are also payable through deduction from the asset value of the Underlying Fund. The ILP sub-fund invests into the USD class. The Annual Management Charge (AMC) of the underlying Fund is:

Underlying Fund Name	AMC
Schroder Asian Growth Fund A Dis USD	1.125%

Past Performance¹: as at 30 June 2022

NOTE: PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE PERFORMANCE.

Fund / Benchmark [^]	3 Months	6 Months	1 Year	3 Years*	5 Years*	10 Years*	Since Inception ^{*2} (29 Jul 2004)
Schroder Asian Growth Fund	-7.15%	-17.38%	-24.47%	3.22%	4.57%	7.75%	10.42%
Benchmark: MSCI All Country Asia ex Japan Index USD (Net Dividend Reinvested)	-10.57%	-15.65%	-23.34%	2.11%	3.30%	5.44%	8.28%

¹ Performance shown in fund currency and calculated before sales charges are deducted. Fees and charges payable through deduction of premium or cancellation of units are excluded in deriving the performance. Performance is calculated on the assumption that all dividends and distributions are reinvested, taking into account all charges which would have been payable upon such reinvestment.

² 29 July 2004 is the launch date of the ILP sub-fund. Previously known as 30 April 2004, which was the Underlying Fund's launch date. On 14 March 2022, this ILP sub-fund was made available for investment under Singlife Savvy Invest.

* Annualised performance

Expense Ratio and Turnover Ratio

Underlying Fund	Expense Ratio	Turnover Ratio
Schroder Asian Growth Fund A Dis USD	1.34%	16.66%

The expense and turnover ratios stated in the table above are for the period ended 30 June 2022.

The expense ratio is calculated in accordance with the Investment Management Association of Singapore guidelines on the disclosure of expense ratios. It does not include (where applicable) brokerage and other transaction costs, performance fee, interest expense, foreign exchange gains /losses, front or back-end loads arising from the purchase or sale of other funds and tax deducted at source or arising out of income received. It is calculated by dividing expenses by daily average NAV, and multiplied by the appropriate factor to annualise the figure and is disclosed as a percentage.

The turnover ratio is calculated based on the lower of purchases and sales expressed as a percentage of the daily average net asset value.

Soft Dollar Commissions or Arrangements

In its management of the Underlying Fund, the Manager currently do not receive or enter into any soft dollar commissions or arrangements.

Conflicts of Interest

The Manager will conduct all transactions with or for the Underlying Fund at arm's length. The Manager may from time to time have to deal with competing or conflicting interests between the other unit Underlying Funds which are managed by the Manager and the Underlying Fund. For example, the Manager may make a purchase or sale decision on behalf of some or all of their other unit trusts without making the same decision on behalf of the Underlying Fund, as a decision whether or not to make the same investment or sale for the Underlying Fund depends on factors such as the cash availability and portfolio balance of the Underlying Fund. However the Manager will use reasonable endeavours at all times to act fairly and in the interests of the Underlying Fund. In particular, after taking into account the availability of cash and the relevant investment guidelines of the other funds managed by the Manager and the Underlying Fund, the Manager will endeavour to ensure that securities bought and sold will be allocated proportionately as far as possible among the Underlying Fund and the other funds managed by the Manager.

The factors which the Manager will take into account when determining if there are any conflicts of interest as described above include the assets (including cash) of the Underlying Fund as well as the assets of the other funds managed by the Manager. To the extent that another fund managed by the Manager intends to purchase substantially similar assets, the Manager will ensure that the assets are allocated fairly and proportionately and that the interests of all investors are treated equally between the Underlying Fund and the other funds. Associates of the Trustee may be engaged to offer financial, banking and brokerage services to the Underlying Fund or buy, hold and deal in any investments, enter into contracts or other arrangements with the Trustee and make profits from these activities. Such services, where provided and such activities, where entered into, will be on an arm's length basis.

Suspension of dealings

Redemptions or subscription of units in the ILP sub-fund may be suspended in certain circumstances, including situations where dealing in the units in the ILP sub-fund are suspended or any other exceptional circumstances which may be determined by the Underlying Funds Manager.

Please refer to the "Suspension of Dealings" section of the Schroder Asian Growth Fund's prospectus for more information.

Reports

The financial year-end of the ILP sub-fund is 30 June. Singapore Life Ltd. will make available semi-annual report and annual audited report of the ILP sub-fund within 2 months and 3 months respectively from the relevant reporting periods.

In addition, Singapore Life Ltd. will make available financial reports of the Underlying Fund as they become available from the Investment Manager. Policyholders can access these reports via the website at www.singlife.com

Specialised ILP sub-fund

The ILP sub-fund is not a specialised sub-fund as set out in MAS Notice 307 on Investment-Linked Policies issued by the Monetary Authority of Singapore.
