In extreme cases, a debt investment could go into default. <p>You are exposed to emerging market risk.</p> <ul style="list-style-type: none"> Emerging markets are less established, and more volatile, than developed markets. They involve higher risks, particularly market, credit, illiquid security, legal, custody, valuation and currency risks. <p>You are exposed to equities risk.</p> <ul style="list-style-type: none"> Equities can lose value rapidly, and typically involve higher market risks than bonds or money market instruments. <p>You are exposed to market risk.</p> <ul style="list-style-type: none"> Prices and yields of securities can change frequently with significant volatility based on a wide variety of factors, such as political and economic news, government policy and climate patterns. <p>You are exposed to Russia risk.</p> <ul style="list-style-type: none"> In Russia, risks associated with custody and counterparties are higher than in developed countries.
