abrdn Pacific Equity (SP)²

abrdn PAC Equity (RP)³

abrdn PAC Equity (SP)³

¹Prior to 11 April 2022, abrdn Select Portfolio was known as Aberdeen Standard Select Portfolio.

²Prior to 11 April 2022, abrdn Pacific Equity (SP) was known as Aberdeen Standard Pacific Equity (SP).

³Prior to 11 April 2022, abrdn PAC Equity (RP) and abrdn PAC Equity (SP) was known as Aberdeen Standard PAC Equity (RP) and Aberdeen Standard PAC Equity (SP).

Structure of ILP sub-fund

The ILP sub-fund is an open-ended feeder fund and invests all or substantially all of its assets into the underlying abrdn Select Portfolio which offers a group of separate and distinct portfolios of securities or obligations, each of which being a sub-fund investing in different securities or portfolios of securities.

The units in the ILP sub-fund are not classified as Excluded Investment Products.

Information on the Managers

The Underlying Investment Manager

abrdn Asia Limited, a wholly-owned subsidiary of the Aberdeen Asset Management PLC, were established in Singapore in May 1992, as the regional headquarters to oversee all of its Asia-Pacific assets, including collective investment schemes. abrdn Asia Limited has managed collective investment schemes and discretionary accounts since May 1992. Aberdeen Asset Management PLC is a wholly owned subsidiary of abrdn plc (abrdn plc and its group of companies shall hereinafter be referred to collectively as the “Group”). As at 30 June 2021, abrdn managed £532 billion in assets on behalf of individuals, governments, pension funds, insurers, companies, charities and foundations across 80 countries.

With effect from 26 October 2021, the name of the manager is changed from Aberdeen Standard Investments (Asia) Limited to abrdn Asia Limited.

Other Parties

Please refer to the sections on “The Trustee/Custodian”, “The Registrar” and “The Auditors” in the abrdn Select Portfolio Prospectus for details of other parties involved in the underlying abrdn Select Portfolio.

Investment Objectives, Focus & Approach

The investment objective of the Underlying Funds are described in the section on “Investment Objectives/Strategies/Policies and Focus of the Sub-Funds” in the abrdn Select Portfolio Prospectus.

Risks

The ILP Sub-Funds are not listed on the Singapore Exchange and you can redeem only on Business Days through Singapore Life Ltd. In respect of Singapore investors, there is no secondary market for the ILP Sub-Fund.

The value of the Underlying Fund may rise or fall. Investments in the Underlying Fund are subjected to various risks such as market risks, fluctuations in interest rates and foreign exchange rates, political instability, exchange controls, change in taxation and foreign investment policies and other restrictions and controls which may be imposed by the relevant authorities in other countries. The risk factors set out herein may cause you to lose some or all of your investment. These risks are elaborated upon below:

Market Risk

The usual risks of investing in listed and unlisted securities apply. Prices of securities may rise or fall in response to changes in economic conditions, political conditions, interest rates, and market sentiment. These may cause the price of units in the Underlying Fund to go up or down as the price of units is based on the current market value of the investments of the Underlying Fund.

Political Risk

An Underlying Fund that invests in countries with less stable political and economic environments and in securities' markets with lower levels of regulation and different accounting, commercial and market practices than those of acceptable international standards are likely to increase the overall risk of the Underlying Fund.

Liquidity Risk

The securities markets of some countries lack the liquidity, efficiency, regulatory and supervisory controls of more developed markets. The lack of liquidity may adversely affect the value or ease of disposal of assets, thereby increasing the risk of investing in such markets.

Settlement Risk/Transactions Risk

The property of the Underlying Fund is held by the Trustee on behalf of the holders, separate from the Trustee's assets. It is therefore protected in the event of the insolvency of the Trustee. There is, however, still a risk that there may be a temporary delay in subscriptions and redemptions of the units.

Regulatory Risk

The investment objectives and parameters of the Underlying Fund are restricted by applicable legislation and regulatory guidelines. There may be a risk that legislative or regulatory changes may make it less likely for an Underlying Fund to achieve its objectives.

Currency Risk/Exchange Rate Risk

The assets and income of the Underlying Fund will be substantially denominated in currencies other than the Singapore dollar. Currency fluctuations between foreign currencies and the Singapore dollar may affect the income and valuation of the assets of the relevant Underlying Fund in ways unrelated to business performance. You should note that we generally do not hedge the currency positions of the Underlying Fund unless circumstances require it and/or as mentioned in this Prospectus. Investments in the USD Class Units and USD Class I Units of the relevant Underlying Fund may also be subject to foreign exchange risk as well as an additional currency hedging cost component.

Taxation

You should note that the proceeds from the sale of securities in some markets or the receipt of any dividends or other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. Tax law and practice in certain countries into which an Underlying Fund invests or may invest in the future (in particular Russia and other emerging markets) is not clearly established. It is possible therefore that the current interpretation of the law or understanding of practice might change, or that the law might be changed with retrospective effect. It is therefore possible that the Underlying Fund could become subject to additional taxation in such countries that is not anticipated either at the date of this Prospectus or when investments are made, valued or disposed of.

Repurchase or Securities Lending Agreements

While the value of the collateral of repurchase or securities lending agreements will exceed the value of the securities transferred, if there is a sudden market movement, there is a risk that the value of such collateral may fall below the value of the securities transferred.

In relation to repurchase transactions, investors should note that (A) in the event of the failure of the counterparty with which cash of the Underlying Fund has been placed, there is the risk that collateral received may yield less than the cash placed out, whether because of inaccurate pricing of the collateral, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) (i) locking cash in transactions of excessive size or duration, (ii) delays in recovering cash placed out, or (iii) difficulty in realising collateral may restrict the ability of the Underlying Fund to meet redemption requests, security purchases or, more generally, reinvestment; and that (C) repurchase transactions will, as the case may be, further expose the Underlying Fund to risks similar to those associated with optional or forward derivative financial instruments,

which risks are further described in other sections of this fund summary. Securities lending involves counterparty risk, including the risk that the loaned securities may not be returned or returned in a timely manner and/or at a loss of rights in the collateral if the borrower or the lending agent defaults or fails financially. This risk is increased when the Underlying Fund's loans are concentrated with a single or limited number of borrowers. Investors must notably be aware that (A) if the borrower of securities lent by the Underlying Fund fails to return these, there is a risk that the collateral received may realise less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Underlying Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Underlying Fund to meet delivery obligations under security sales.

Derivative Usage

The Underlying Fund may use financial derivative instruments for the purposes of hedging and/or efficient portfolio management to the extent permitted in the Deed. In no event are financial derivative instruments used to lever an Underlying Fund.

Total Derivatives Exposure

We will ensure for the Underlying Fund that its exposure relating to financial derivative instruments does not exceed the total net value of its portfolio. We will ensure that the global exposure of each Underlying Fund to financial derivative instruments or embedded financial derivative instruments will not exceed 100% of the net asset value of such Underlying Fund at all times. Such exposure will be calculated using the commitment approach as described in, and in accordance with the provisions of, the Code.

Execution of Trades

An automated trading system provides for the capture of orders from the fund manager for transmission to an independent dealing function which facilitates management of the dealing process and, once executed, onward transmission to the back office trade processing function. It is used for the execution of fixed and equity securities, exchange-traded derivatives and OTC derivatives.

Description of risk management and investment control procedures we adopt

An electronic guideline monitoring system, which is integrated within the trading platform, gives pre-deal alerts to fund managers and post-deal exception reports to the Investment Control Department in respect of actual and potential breaches of investment restrictions. This includes total derivatives exposure and counterparty exposure. Such system is maintained independently of the fund managers by the Investment Control Department. Monitoring for derivatives and physical assets takes place on a pre-trade basis.

We will ensure that the risk management and investment control procedures adopted are adequate and have been implemented and that we have the necessary expertise to control and manage the risks relating to the use of financial derivatives.

In the event an Underlying Fund nets its OTC derivative positions, such netting arrangements shall satisfy the relevant conditions described in the Code, including obtaining the legal opinions as stipulated in the Code.

Counterparty Risk

In some markets there may be no secure method of delivery against payment which would avoid credit risk exposure to a counterparty. Each Underlying Fund may enter into transactions and other contracts that entail a credit exposure to certain counterparties. To the extent that a counterparty defaults on its obligation and the Underlying Fund is delayed or prevented from exercising its rights with respect to the investments in its portfolio, it may experience a decline in the value of its position, a loss of income and possible additional costs associated with asserting its rights. Where financial instruments are dealt in over-the-counter markets ("OTC"), it may be necessary to make payment on a purchase or delivery on a sale before receipt of the securities or, as the case may be, sale proceeds.

Subject to the provisions of the Code:

(a) the risk exposure of an Underlying Fund to a counterparty in an OTC derivative transaction may not exceed 10% of its net assets when the counterparty is a credit institution, which has its registered office in a country which is a EU Member State or if the registered office of the credit institution is situated in a non-EU Member State provided that it is subject to prudential rules equivalent to those in EU Member States;

(b) the Underlying Fund are restricted to dealing with OTC derivative counterparties, which are rated between AAA and A- (S&P/Fitch) or Aaa and A3 (Moody's) for non-collateralised business counterparties, or between AAA and BBB+ (S&P/Fitch) or Aaa and Baa1 (Moody's) for collateralised business counterparties, or such ratings as may be allowed by the Code, as amended from time to time.

Where multiple external ratings are available, the following is taken into account:

- (I) if there are any differences between ratings, the lowest published rating is used.

Where the counterparty is not rated by multiple external rating agencies, the following is taken into account:

- (II) if there is only one or less external rating available (Fitch, S&P, Moody's), then the full financial statements of the counterparty is to be provided by the Front Office and reviewed by the Counterparty Credit Risk team in order to formulate a credit opinion and an internal rating.

The counterparty will then be brought to the Derivative and Credit Oversight Committee for final credit sanctioning.

Where financial instruments are dealt on cash "delivery versus payment" type transactions (DVP), there is a replacement risk if the counterparty is unable to deliver the securities or the cash to an Underlying fund. The Sub-Funds are restricted to dealing with DVP Cash brokerage counterparties, which are rated between AAA and BBB- (S&P/Fitch) or Aaa and Baa3 (Moody's).

If there are no external ratings available at all (Fitch, S&P, Moody's), then the full financial statements of the counterparty is to be provided by the front office and reviewed by the counterparty credit risk team in order to formulate a credit opinion and an internal rating.

All counterparties are reviewed and rated at least once a year by the Counterparty Credit Risk team.

Capacity Restrictions

There is a possibility that an Underlying Fund may be closed to new subscriptions or switches into such Underlying Fund without prior notice to its holders in certain circumstances, for instance, where the Underlying Fund has reached a size such that the capacity of the market and/or the capacity of the relevant Investment Adviser has been reached, and where to permit further inflows would be detrimental to the performance of the Underlying Fund. In such case, the Investment Adviser may also need to restrict or close new subscriptions or switches into a Fund which invests into the affected Underlying Fund.

The risk disclosures included in this section are intended to summarise some of the general risks associated with an investment in the Underlying Fund, but they are not exhaustive and do not constitute or purport to offer advice on the suitability of investments in the Underlying Fund. You should consult your financial advisors.

Risk of using rating agencies and other third parties

Credit ratings of instruments invested into by an Underlying Fund represent our and/or rating agencies' opinion regarding the credit quality of the instrument or the institution and are not a guarantee of quality. Rating methodologies generally rely on historical data, which may not be predictive of future trends and adjustments to credit ratings in response to subsequent changes in circumstances may take time. When a debt security is rated, the downgrading of such debt security could decrease the value and liquidity of the security. The Group does not solely rely on ratings issued by credit rating agencies. We carry out detailed credit assessments on every company we cover and use the input from credit rating agencies where appropriate. We have established a set of internal credit assessment standards and have put in place a credit assessment process to ensure that the relevant Underlying Fund's investments are in line with these standards. Information on our credit assessment process will be made available to investors upon request.

Specific Risk

Exposure to a single country market or specific general market increases potential volatility because the concentration in a single country market or specific general market makes it less diversified compared to an exposure to specific regional or global markets.

Fees and Charges

In addition to the fees and charges shown in the Product Summary, the following fees are payable through deduction from the asset value of the ILP sub-fund:

Fees Payable by the Underlying Fund, which the ILP sub-fund invests into	
Underlying Fund Name	Annual Administration Fee
abrdr Pacific Equity Fund	1.5% (except for the current USD Class I Units which have an annual management fee of 1%); no double charging of management fees within feeder funds. Maximum is 2.5%.

Soft Dollar Commissions or Arrangements

The Manager do not receive soft-dollar commissions or arrangements for the Underlying Fund.

Soft Dollar Commissions or Arrangements

We do not receive soft-dollar commissions or arrangements for the Underlying Fund.

Conflicts of Interest

We may from time to time have to deal with competing or conflicting interests of the Underlying Fund with other funds managed by us. For example, we may make a purchase or sale decision on behalf of some or all of the other funds managed by us/them without making the same decision on behalf of the Underlying Fund, as a decision whether or not to make the same investment or sale for the Underlying Fund depends on factors such as the cash availability and portfolio balance of the Underlying Fund.

However, we will use reasonable endeavours at all times to act fairly and in the interests of the Underlying Fund. In particular, after taking into account the availability of cash and relevant investment guidelines of the other funds managed by us and the Underlying Fund, we will endeavour to ensure that securities bought and sold will be allocated proportionately as far as possible among the Underlying Fund and the other funds managed by us.

The factors which we will take into account when determining if there is any conflict of interest as described in the paragraph above include the aggregation of the purchase of the assets of the Underlying Fund. To the extent that another fund managed by us intends to purchase substantially similar assets, we will ensure that the assets are allocated fairly and proportionately and that the interests of all investors are treated equally between the Underlying Fund and the other funds.

We may purchase, hold or redeem units in the Underlying Fund for our own account. If there is any conflict of interest arising as a result of such dealing, we and the Trustee will resolve the conflict in a just and equitable manner as we/they deem fit. We and the Trustee shall conduct all transactions with or for the Underlying Fund on an arm's length basis.

Associates of the Trustee may be engaged to provide financial, banking and brokerage services to the Underlying Fund. Such services where provided, will be on an arm's length basis. Our associates may be engaged to provide services such as financial, banking or brokerage services, to the Underlying Fund. Such services where provided, will be on an arm's length basis.

Reports

The financial year-end of the ILP Sub-Fund is 30 June. Singapore Life Ltd. will make available semi-annual report and annual audited report of the ILP Sub-Fund within 2 months and 3 months respectively from the relevant reporting periods.

In addition, Singapore Life Ltd. will make available financial reports of the Underlying Fund as they become available from the Investment Manager. Policyholders can access these reports via the website at www.singlife.com

Specialised ILP Sub-Fund

The ILP Sub-Fund is not a specialized sub-fund as set out in MAS Notice 307 on Investment-Linked Policies issued by the Monetary Authority of Singapore.
