Product-Specific Risks

You are exposed to a sectoral fund.

- Investments in single sector funds may present greater opportunities and potential for capital appreciation, but may be subject to higher risks as they may be less diversified than investments in multisector funds.

You are exposed to the risk of investments in healthcare securities.

- Equity shares of global healthcare companies will fluctuate in value due to market conditions, currency values, economic, political and other factors. Such fluctuations may be substantial and may be greater than the fluctuation in values of shares of portfolios with broader industry diversification.

You are exposed to political risk.

- The Underlying Fund's investments may be adversely affected by political instability, exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls.

You are exposed to derivatives risk.

- The Underlying Fund may use or invest in FDIs. An investment in a FDI may require the deposit of initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. We have the controls for investments in FDIs and have in place systems to monitor the derivative positions of the Underlying Fund.

You are exposed to foreign exchange and currency risk.

- Where investments are denominated in a currency that is different from the currency of denomination of the Underlying Fund or the relevant Class, fluctuations of the exchange rates of such currencies against the currency of the Underlying Fund or Class may affect the value of Units. The foreign currency exposure of the Underlying Fund or Class may not be fully hedged depending on the circumstances of each case. In the case of Hedged Classes, we currently adopt a passive hedging policy. Notwithstanding the above, we retain the discretion to adopt any other hedging policy as we may determine from time to time. There can be no guarantee that the hedging strategy applied in a Hedged Class will entirely eliminate the adverse effects of changes in exchange rates.

You should be aware that the Underlying Fund may be exposed to other risks of an exceptional nature from time to time.
